Klinghammer SIA 220

bordonadora

The machine is used for beading round can bodies. Since it operates with beading shafts mounted on one side, it can be beaded not only can bodies but also finished cans with the bottom already seamed. This is an advantage when cans are produced on automatic flanging machines, since previously flanging cans can buckle in the flanges during flanging. Protective beading and external beading production is possible.

Especificaciones técnicas

CazProductNumber EMPRESA	5816
Nombre	Klinghammer SIA 220
Herramientas	230~217 mm
Altura mínima del envase	50 mm
Altura máxima del envase	300 mm
Diámetro mínimo de la lata / tapas	80 mm
Diámetro máximo de la lata / tapas	230 mm
Forma del envase	conical
Velocidad hasta	100-240 cans per minute
