

Germann & Frei SBV 400

pestañadora • bordonadora

This machine has got 6 flanging heads and 8 beading heads and is very compact. The flanging station is working according to the well proven spin flanging principle, the beading station with an outside and an inside mandrel. The machine can be used for the production of welded can bodies. It is of vertical design, very precise and thus best suitable for the use with very thin double reduced tinplate in DR quality.
